Behlman Electronics announces that its Model DCA2000 Power Supplies have again been selected for use in mission-critical U.S. Navy systems.

Provides power for control systems used for targeting, gun fire support, ship self-defense and situational awareness.

Hauppauge, New York, July 29, 2013 – Behlman Electronics, Inc., a leading provider of power products for military, industrial and commercial applications, has received a follow-on order for its Model DCA2000 COTS Power Supply from a major provider of motion systems.

Behlman's DCA2000 series of COTS power supplies are highly reliable switch-mode units designed and manufactured to meet the input requirements of MIL-STD-704 and MIL-STD-1399, the environmental requirements of MIL-STD-810, and EMI/EMC requirements of MIL-STD-461. They are available with a wide range of outputs from 3.3 VDC to 100 VDC, and power levels from 1500 to 3000 watts. This enables them to be used in mission-critical military applications, as well as in high-end industrial and commercial applications, where very high reliability performance is paramount.

According to Behlman president, Ron Storm, *"With their ability to provide a wide variety of requirements for input power, shock, vibration, humidity, and EMI/EMC, our DCA2000 series of COTS power supplies have been called 'rock-solid high performers' with good reason. This add-on contract for Behlman DCA2000 power supplies is confirmation of their high performance."*

Detailed information about Behlman COTS Model DCA2000 Power Supplies is immediately available at <http://www.behlman.com/cots.htm#94036>.

Behlman Electronics Inc., (www.behlman.com), a subsidiary of Orbit International Corp., manufactures and sells high quality standard, modified standard, custom and COTS power solutions, including AC power supplies, frequency converters, inverters, DC-DC, AC-DC, DC-AC, and uninterruptible power supplies. Behlman also offers its line of 700-, 1000-, and 1500-watt VPXtra™ VITA-compliant power supplies, which have raised the power ceiling for VPX system designers worldwide.

Orbit International Corp., (www.orbitintl.com), based in Hauppauge, New York, is involved in the manufacture of customized electronic components and subsystems for military and nonmilitary government applications. Other subsidiaries include Orbit Instrument, Tulip Development Laboratory and Integrated Combat Systems.
